INTELLIGENCE DATA HANDLING SYSTEM - PE 310250

AS OF 13 APRIL 1973

DESCRIPTION

The intelligence data handling system is comprised of those DoD activities which manage and/or operate automatic data processing resources that process and manipulate raw information and intelligence data as required.

Thirty-three DoD organizations, including DIA, the U&S Commands, subordinate Joint and Service Components and Service agencies. Units are listed on following page.

MANAGEMENT OBJECTIVES

To establish an integrated information handling system responsive to the intelligence requirements of the National Command Authorities, the Joint Chiefs of Staff, the Unified and Specified Commands, subordinate Joint and Service components, deployed forces, and the U.S. intelligence community. Subobjectives are as follows:

(1) Establish and maintain an effective IDHS management structure.
(2) Develop user oriented, conversational, information processing systems.
(3) Provide for a system of distributed data bases.
(4) Provide an internetted system for the regional and worldwide transmission of automated intelligence data.
(5) Establish a reliable IDHS totally responsive to user needs.
(6) Resolve the ADP multi-level security problem.
